Sales Associate
Five Below, Bloomington, IL
Sept 2018 - July 2019

- Assisted customers by answering questions and resolving concerns in a professional manner
- Managed multiple responsibilities in a fast-paced retail environment
- Coordinated with team members to maintain efficient store operations

TECHNICAL SKILLS

Operating Systems – Windows 10/11, Windows Server, Linux
Networking – IP addressing, subnetting, routing and switching fundamentals, OSPF, DHCP
Security – Snort, Splunk
Tools & Technologies – Microsoft 365, Active Directory, Wireshark, and VirtualBox

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Certified Ethical Hacker (CEH) - TestOut Continuing Education
Certified Wireless Network Administrator (CWNA) – CWNP
CCNA: Enterprise Networking, Security & Automation (Badge) – Cisco
Introduction to Cybersecurity (Badge) – Cisco
May 2025
March 2024 – March 2027
December 2023
December 2024

PROJECTS

Cisco Networking Labs (CCNA-Level Coursework)

- Configured Cisco 1921 routers and Cisco 2960 switches in a lab environment
- Performed basic IP addressing, subnetting, and routing setup
- Applied troubleshooting techniques to resolve connectivity issues between devices

Capstone Project – Intrusion Detection with Snort & SIEM

- Implemented Snort IDS to monitor and detect suspicious traffic in a virtualized environment
- Utilized Splunk as a SIEM to aggregate and analyze logs for centralized event monitoring
- Cooperated with group members to develop proper documentation of the system design, configuration, and findings

Client-Server Communication Project (Python)

- Built a simple TCP-based client-server system using Python sockets
- Implemented multi-threading to handle multiple client connections
- Utilized various analysis tools such as top, strace, and Python's Threading Modules
